There's no ward like home

# Health and Wellbeing Outcomes

1	People are able to look after and improve their own health and wellbeing and live in good health for longer.
2	People, including those with disabilities or long term conditions, or who are frail, are able to live, as far as reasonably practicable, <u>independently and at home or in a homely setting</u> in their community.
3	People who use health and social care services have positive experiences of those services, and have their dignity respected.
4	Health and social care services are centred on helping to maintain or <u>improve the quality of life</u> of people who use those services.
5	Health and social care services contribute to <u>reducing health inequalities</u> .
6	People who provide unpaid care are supported to look after their own health and wellbeing, including to reduce any negative impact of their caring role on their own health and well-being.
7	People who use health and social care services are safe from harm.
8	People who work in health and social care services feel engaged with the work they do and are supported to continuously improve the information, support, care and treatment they provide.
9	Resources are used effectively and efficiently in the provision of health and social care services.

“A good house is the underpinning  
foundation of wellbeing across the  
life-course.....

....achieved through the  
*organised efforts of society.*”

“A good ~~house~~ home is the underpinning foundation of wellbeing across the life-course”

# What work has been done before? - Fife

## NHS Data (OASIS)

- A&E (and Minor Injuries Unit [MIU])
- Inpatients & Day cases
- Obstetrics
- Mental Health Inpatients
- Outpatients
- Mental Health Outpatients

## Fife Council

## Homelessness Data (HL1)

Compared people in HL1 with general Fife population

### A&E Attendance Rate per 1,000 Population

Attendances at two Fife Acute Hospitals

### Emergency Admission Rate per 1,000 Population

Patients admitted to hospital as an emergency

Time period: **15 years of data:**

June 2001 - Nov 2016

Study: **1.3million** individuals

Design: Data Linkage exercise

## **Cohort & Case Control Study**

Cohorts:

- EHC (Ever Homeless Cohort) **435,853**
- MDC (Non-homeless - Most Deprived)
- LDC (Non-homeless - Least Deprived)

Datasets:

- Scottish Government Homelessness Data (**HL1**)
- Accident and Emergency (A&E2)
- Inpatient and Day Cases (SMR01)
- Mental Health (SMR04)
- Outpatients (SMR00)
- PIS Prescribing Information (PIS)
- Scottish Drugs Misuse Database (SMR24, SMR25a)
- NRS (National Records of Scotland) deaths dataset

Health and Homelessness in  
Scotland

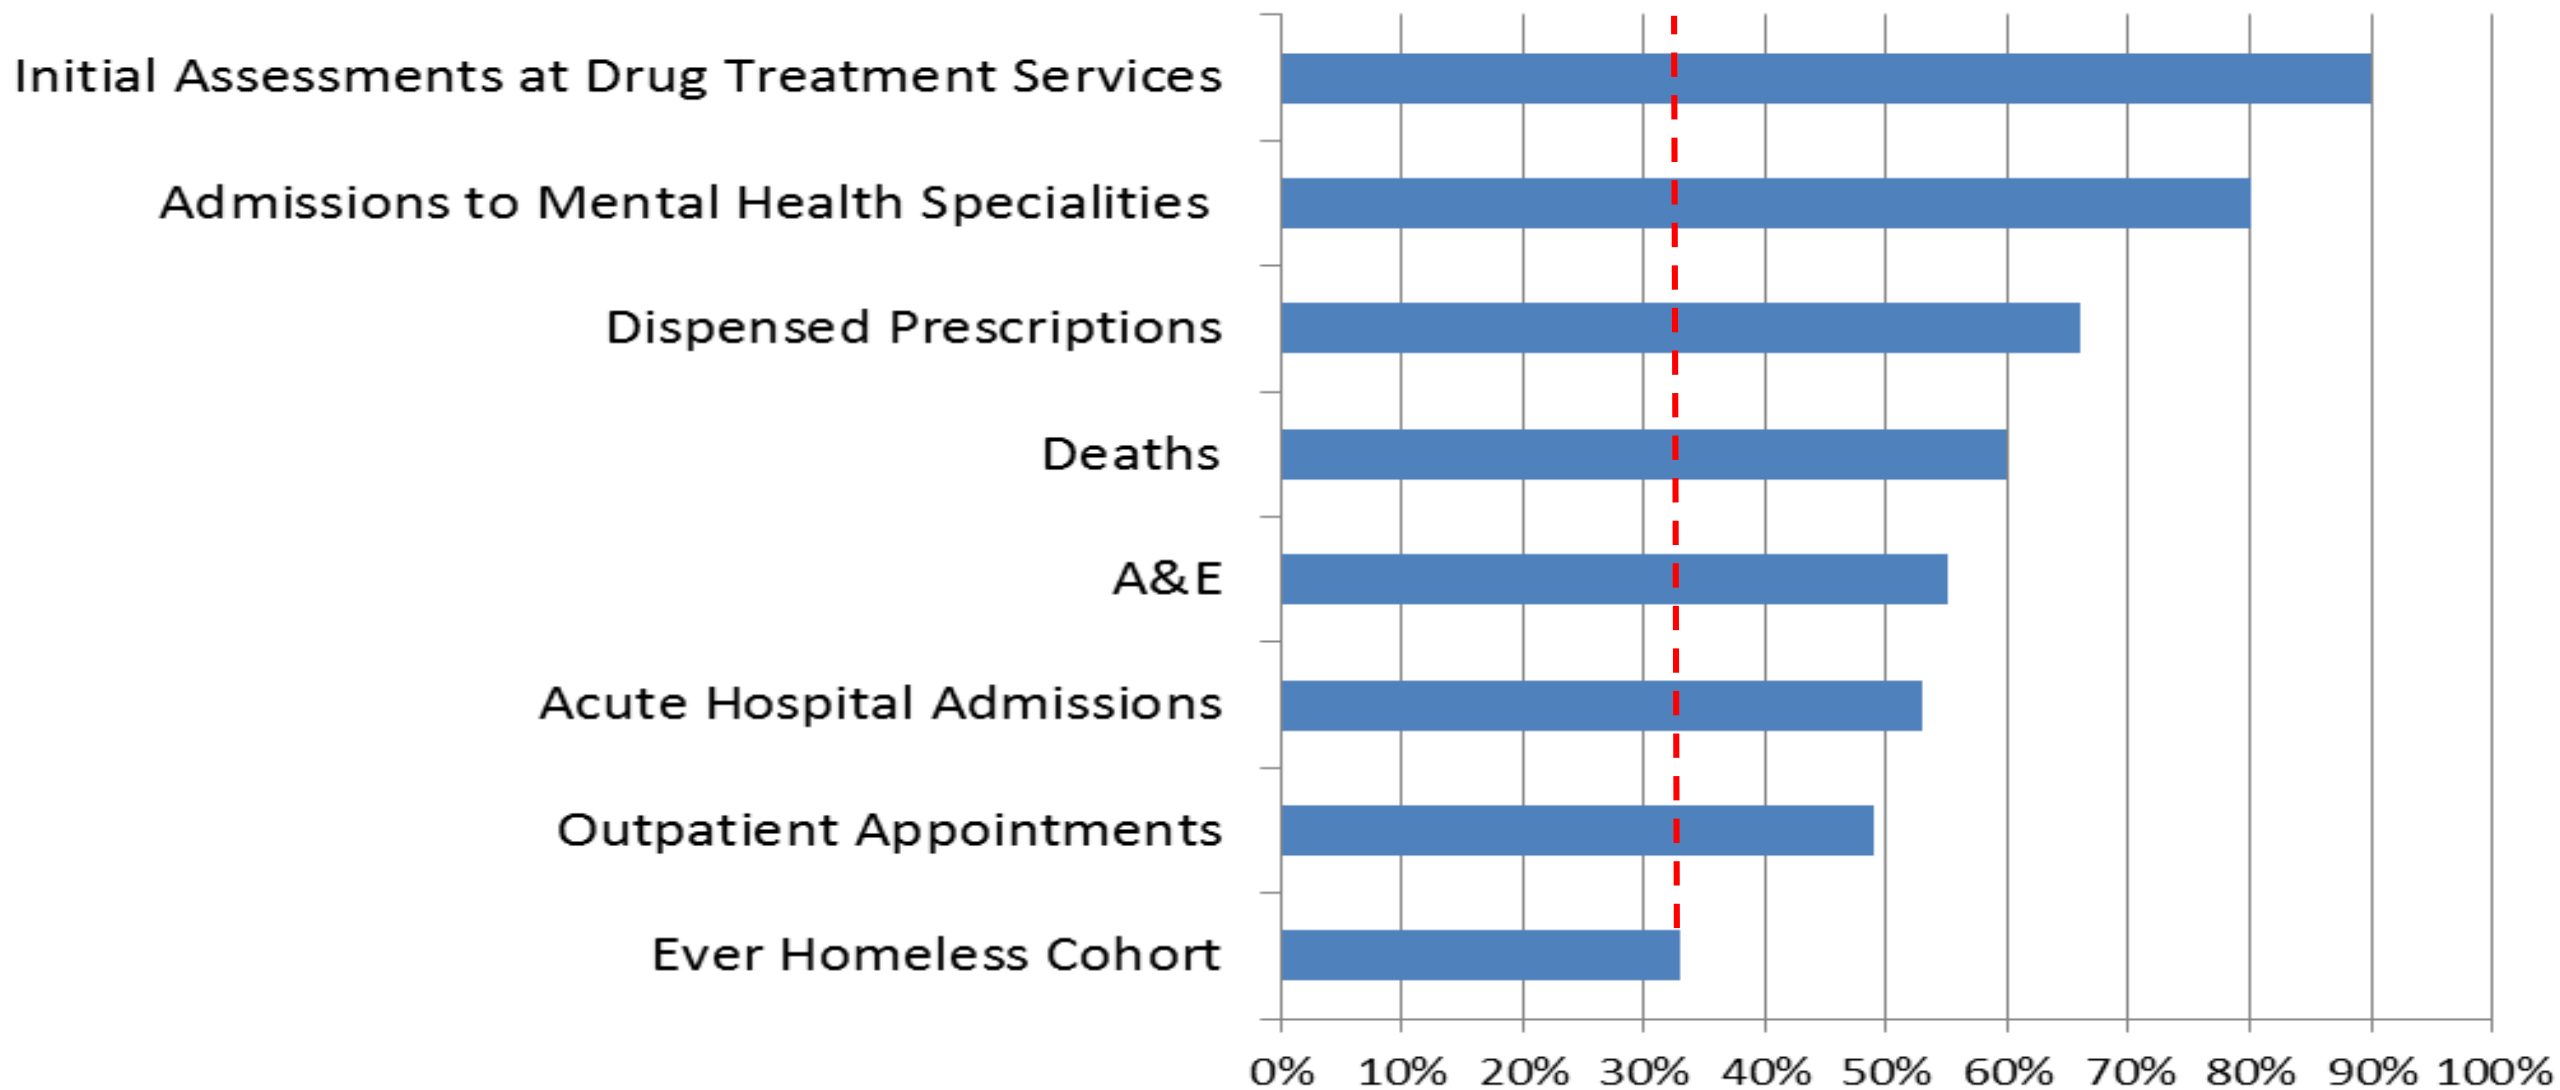

PEOPLE, COMMUNITIES AND PLACES

 social  
research

<http://tinyurl.com/hhscot>

# Proportion of Interactions with each Health Service Dataset

People in the EHC are over-represented in all datasets

# Proportion of people in each cohort using selected services

	EHC		MDC		LDC	
	M	F	M	F	M	F
A&E	68%	66%	52%	50%	38%	32%
Inpatient	61%	65%	44%	46%	32%	31%
Outpatient	80%	87%	63%	70%	54%	58%
Mental Health	7.2%	4.9%	1.4%	1.1%	0.4%	0.4%
SDMD	8.8%	4.0%	1.2%	0.5%	0.1%	0.0%

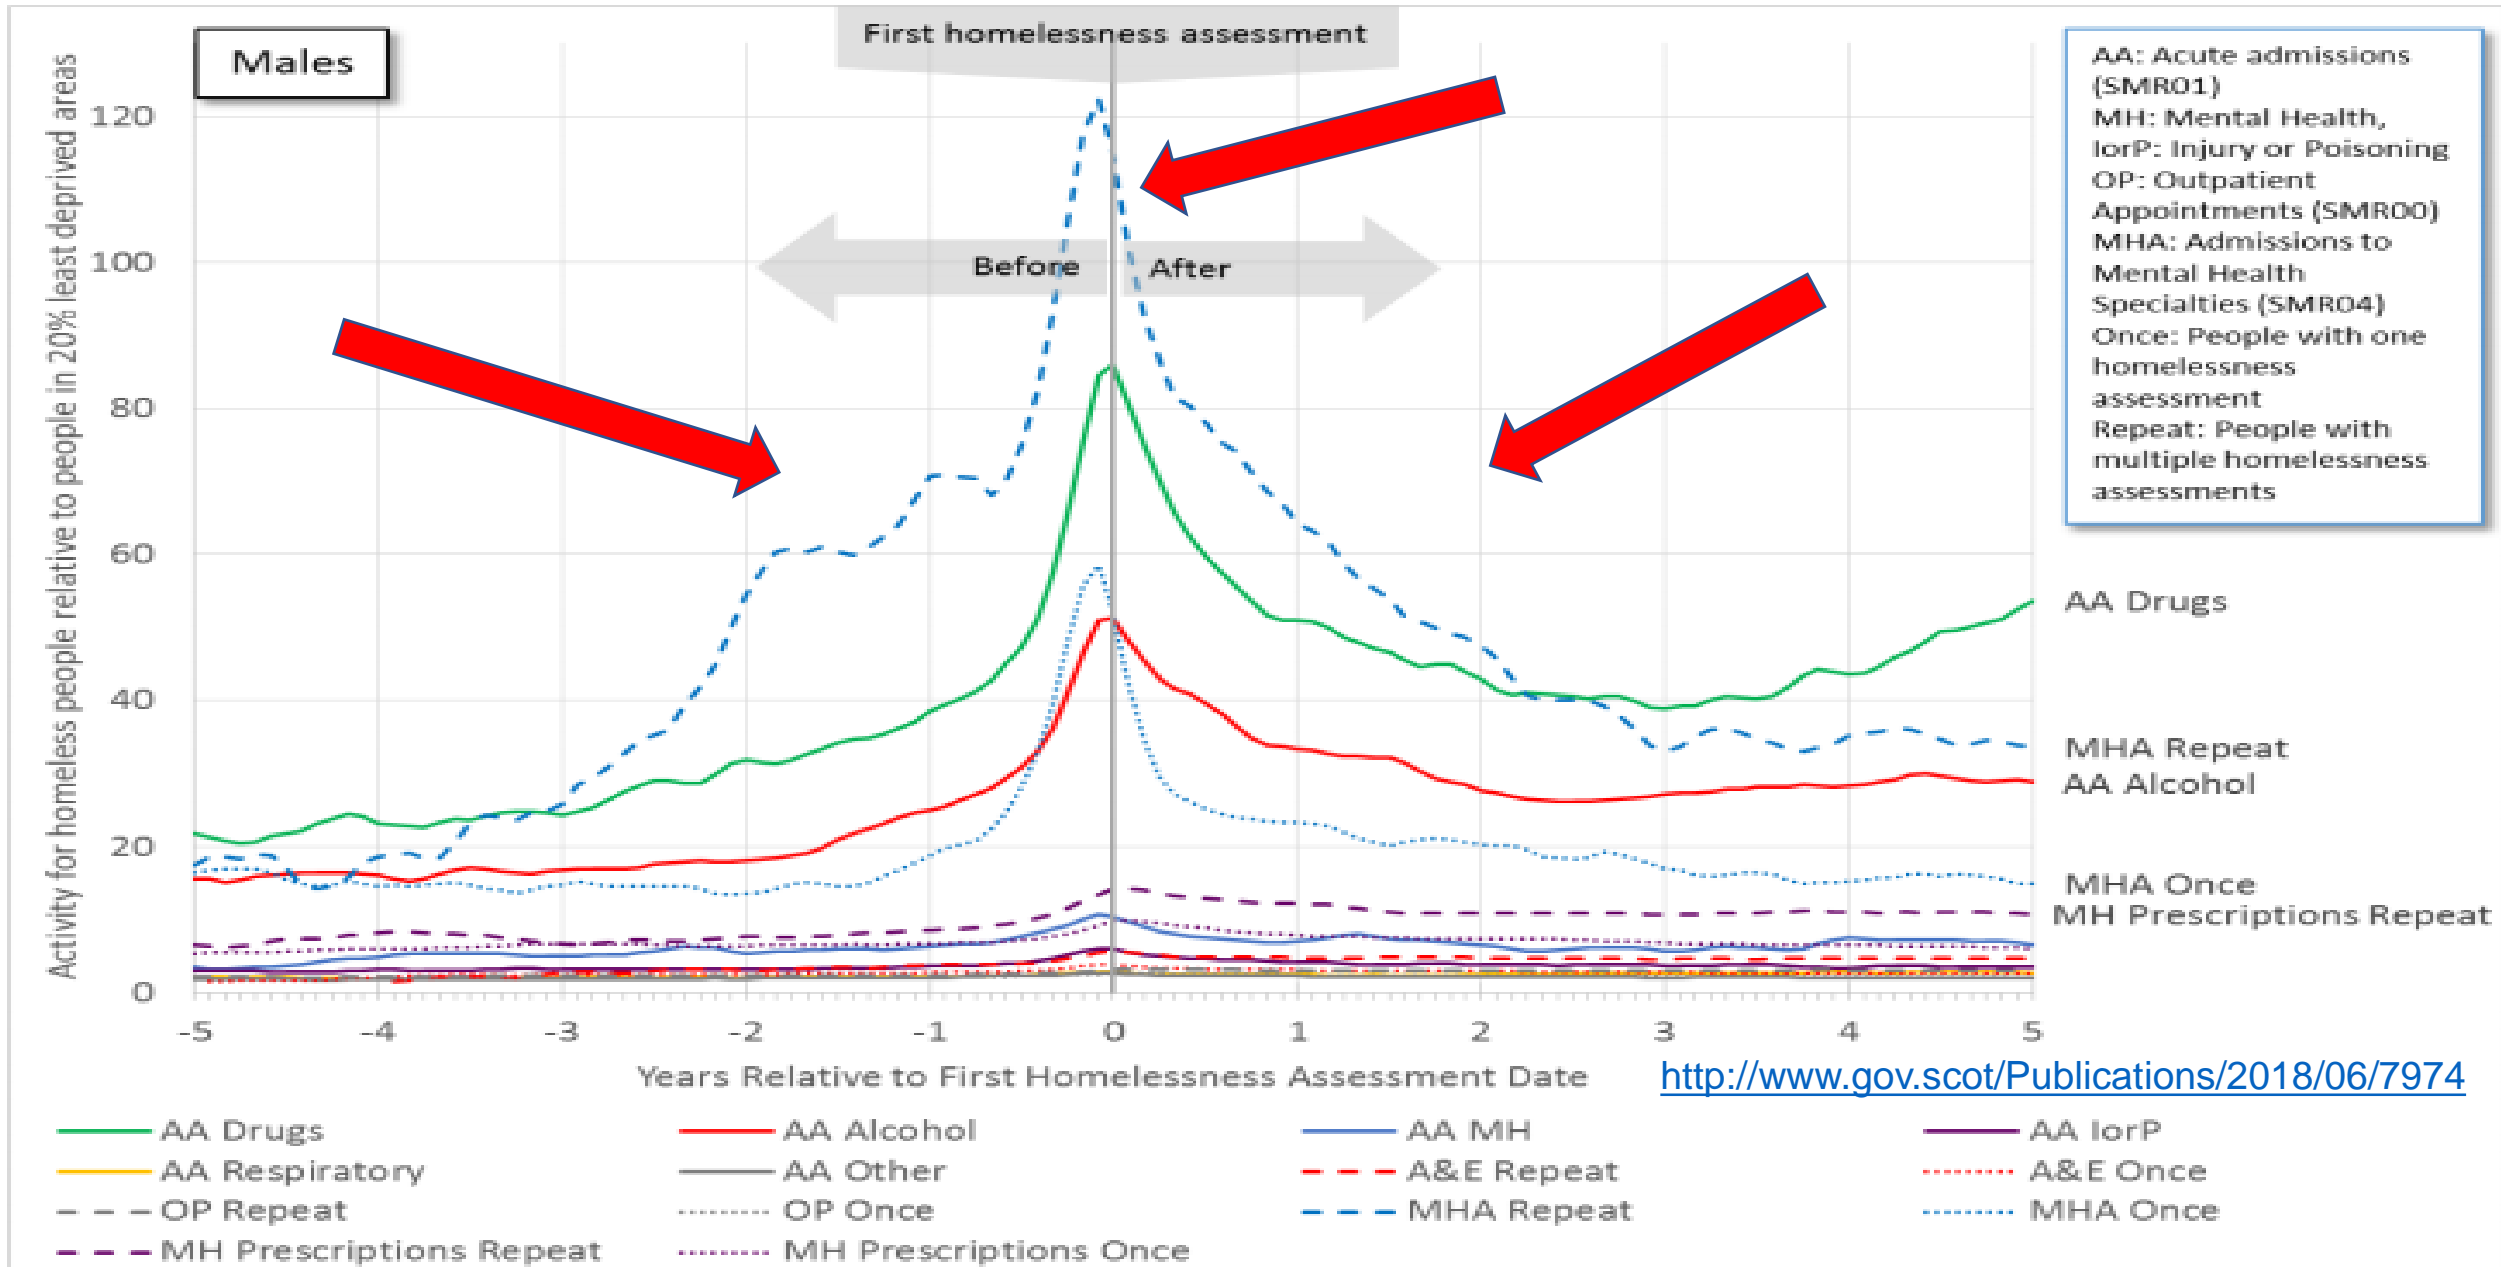

SDMD = Scottish Drugs Misuse Database

People who have experienced homelessness are more likely to have used the above services.

# Cohort Ratio Differences – Key Slide

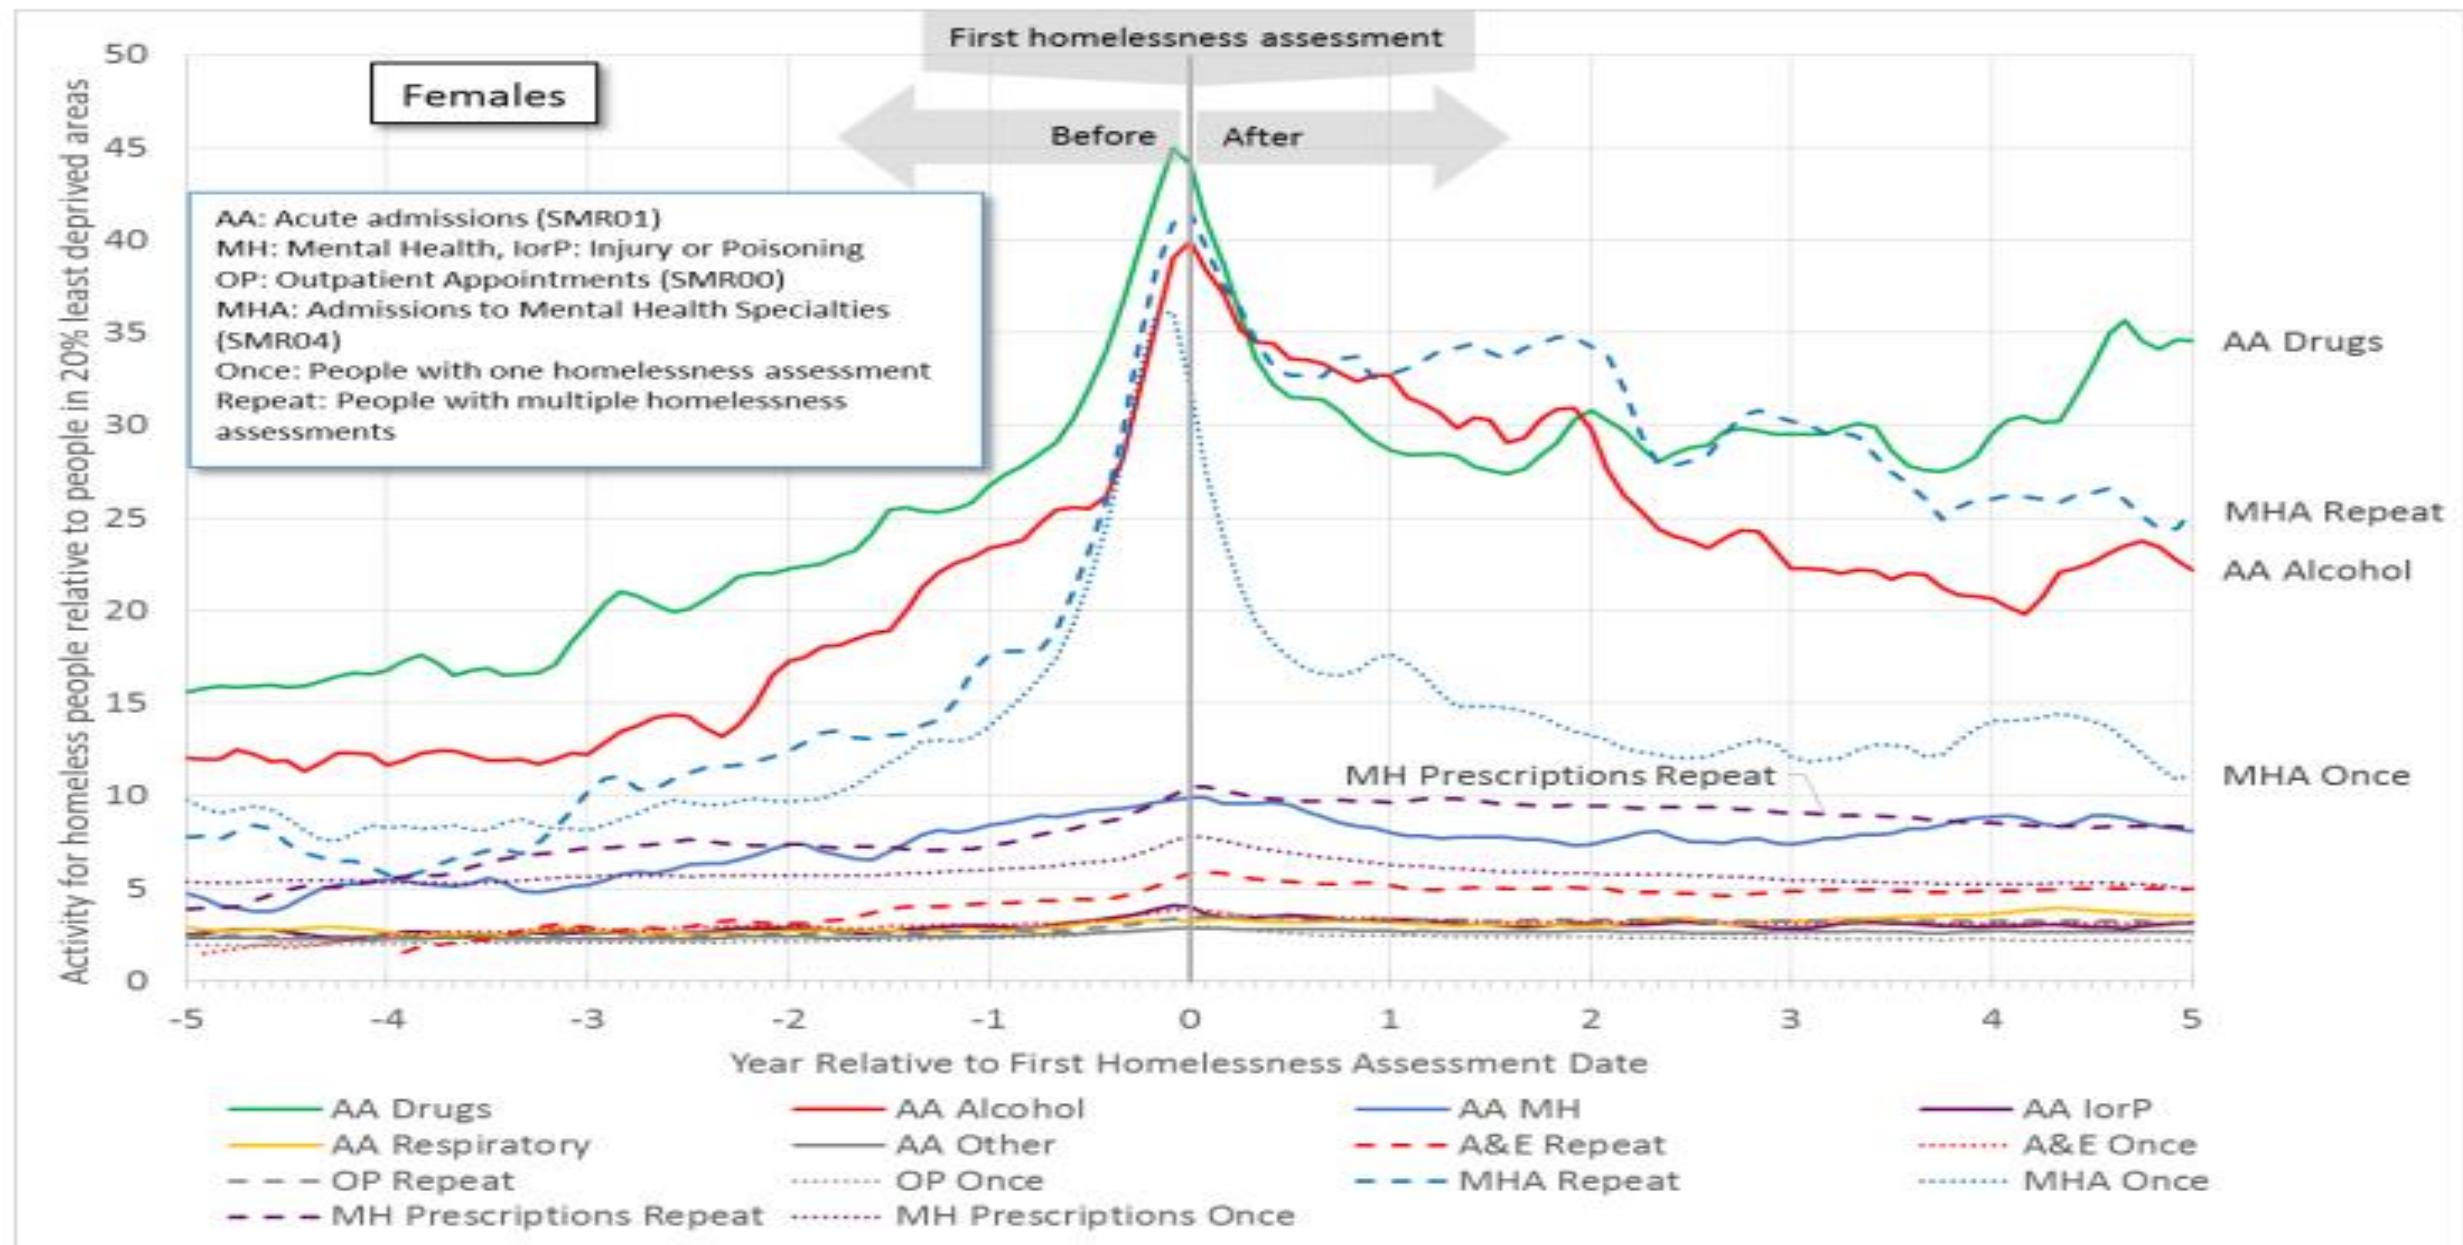

Dataset (health care measure)	EHC : MDC	EHC : LDC
A&E	1.8	3.5
Acute Hospital Admissions	1.7	3.1
Outpatient Appointments	1.6	2.3
Dispensed Prescriptions	2.5	8.2
• Opioid	6.5	169
• Alcohol	3.9	23.6
Admissions to Mental Health Specialities	4.9	20.5
Initial Assessments at Drug Treatment Services	10	133
Deaths	2.1	5.3

**Figure 11.1a: An increase in health activity precedes the first homelessness assessment for males. Soon after this date, particularly for drug-related and alcohol-related acute admissions, and for repeat homeless admissions (SMR04) and mental health prescriptions.**

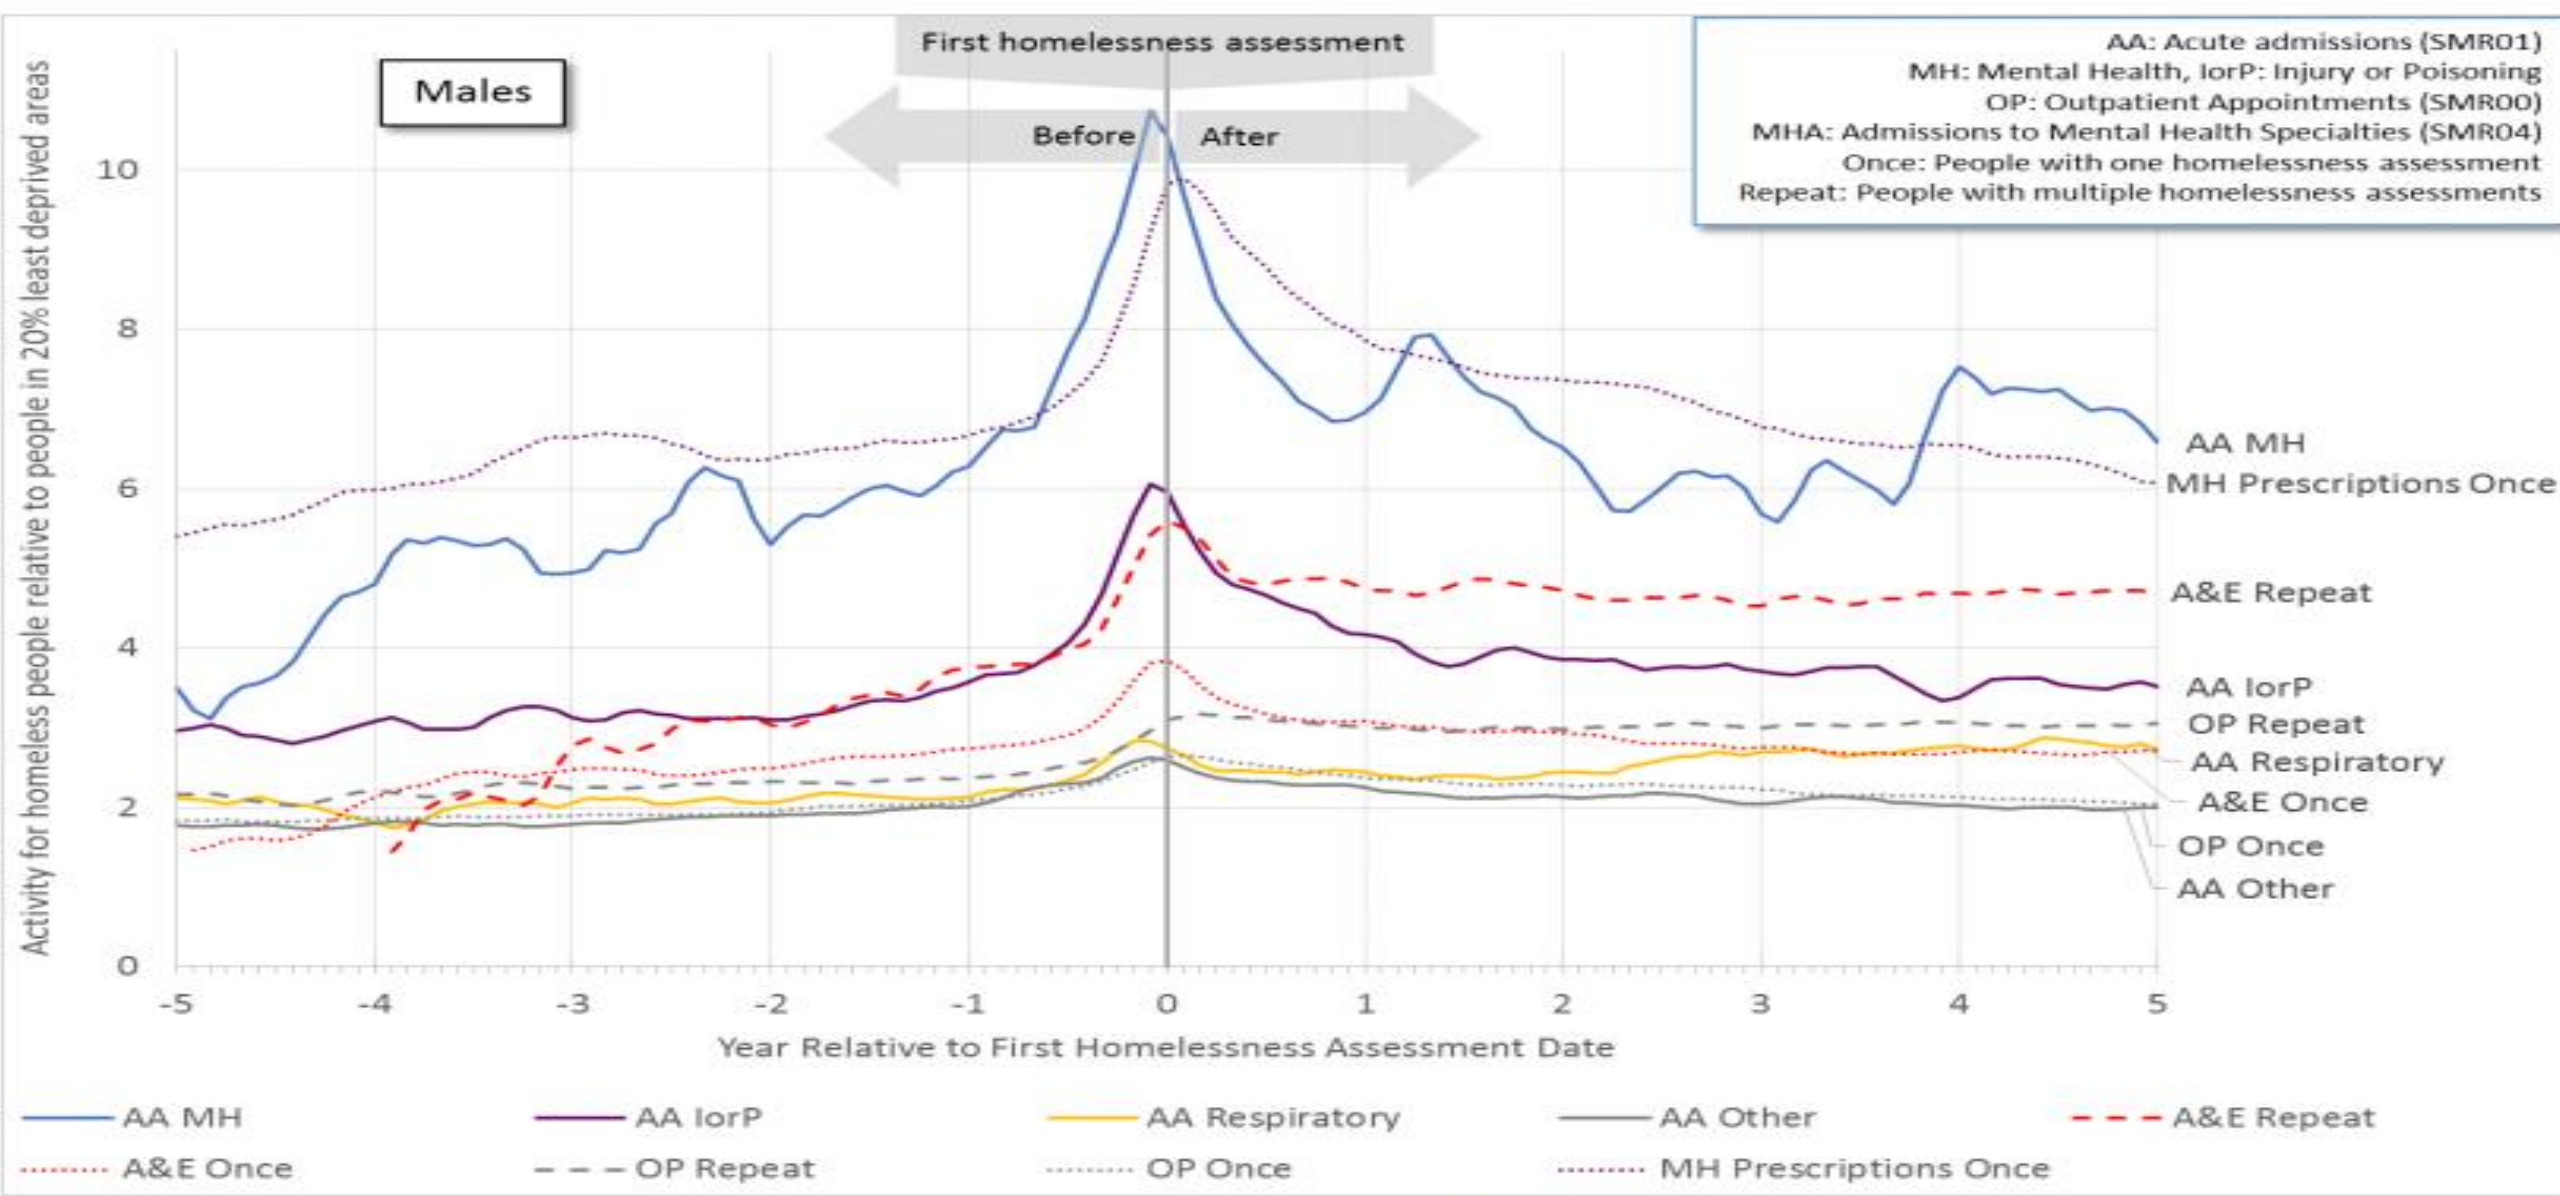

**Figure 11.2a: An increase in health activity precedes the first homelessness assessment for females.** Some activity is higher after this date, particularly for drug-related and alcohol-related acute admissions, and for repeat hospital health admissions (SMR04) and mental health prescriptions.

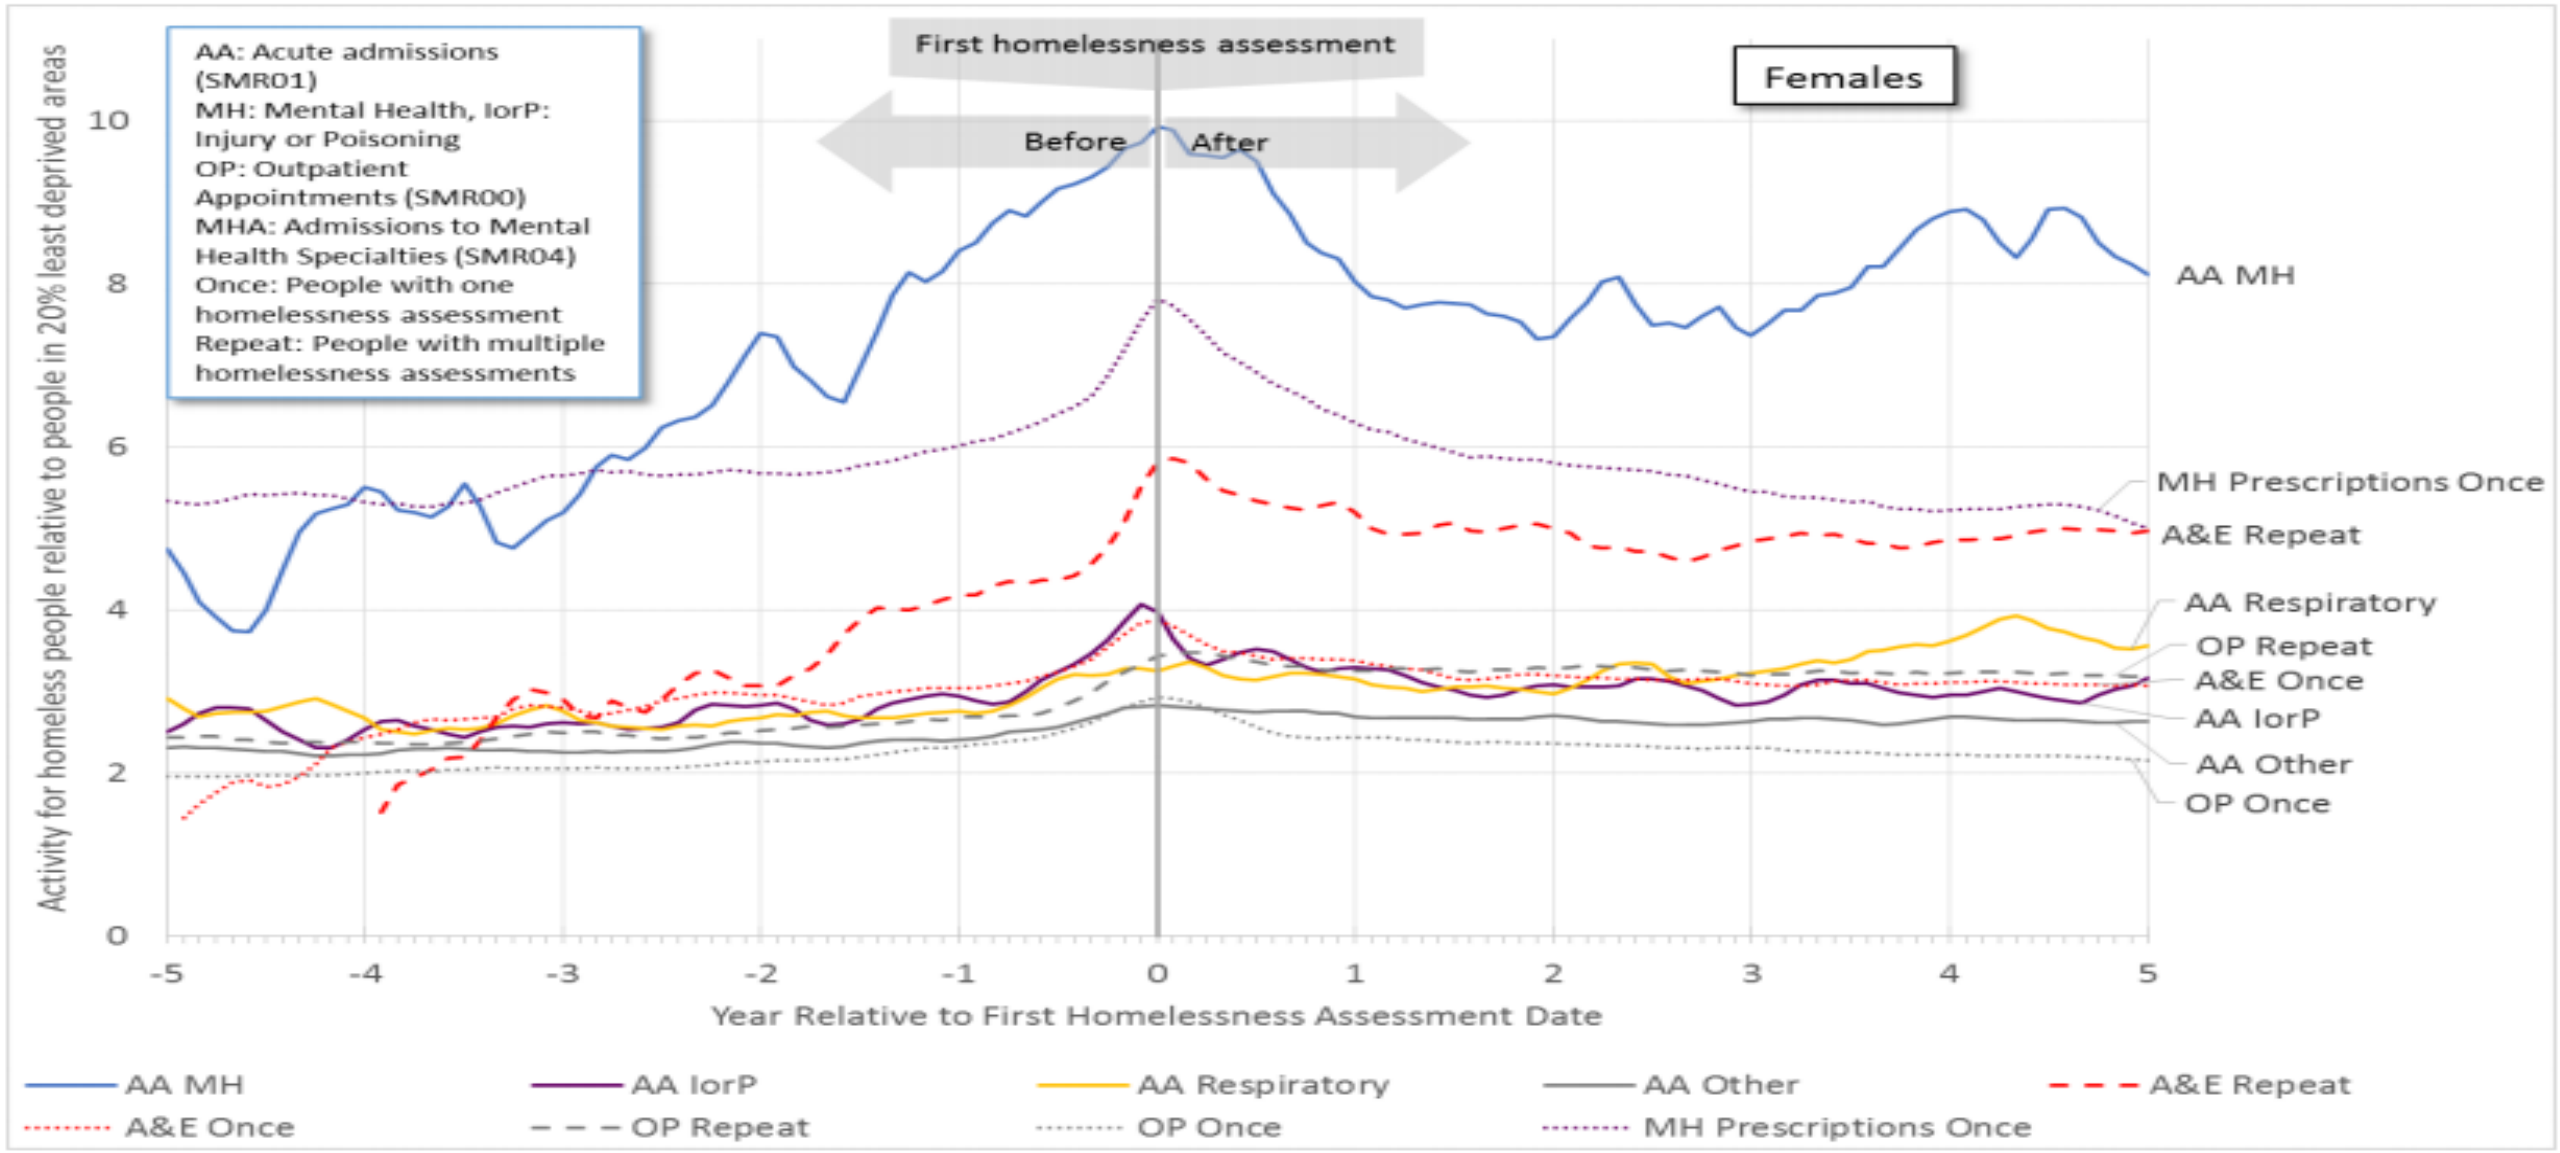

**Figure 11.1b:** An increase in health activity precedes the first homelessness assessment for **males**. Some activity after this date, particularly for mental health acute admissions (SMR01), mental health prescriptions and A&E attend repeat homeless persons.

**Figure 11.2b:** An increase in health activity precedes the first homelessness assessment for **females**. Some activity is higher after this date, particularly for mental health acute admissions (SMR01), mental health prescriptions and A&E by repeat homeless persons.

# Data – Linkage as driver for:

Improvement in understanding of:

- causes
- consequences
- interventions

Improvement in:

- service design
- joint working

Root Causes

Consequences

Interventions

How can we ensure that hidden populations are represented in data linkage projects?

NHS  
Health  
Scotland

Housing strategies briefing paper  
September 2018

'Colleagues from both sectors should seek public health representation in key strategic forums and planning processes relevant to housing, in order to maximise the potential contribution of good housing to improving health and reducing inequalities. Public health teams should also consider the contribution good housing can make to local priority areas identified through Community Planning, and how this contribution can be embedded into Local Outcome Improvement Plans and locality plans.'

To support achievement of this recommendation we have produced this briefing paper for public health practitioners. It seeks to enable public health teams to engage with housing colleagues in the development of key housing plans and strategies. It outlines strategies and plans relevant to housing that local authorities (LAs) produce, and highlights opportunities for public health to engage so that the contribution that these plans and strategies can make to good health and reduced health inequalities is maximised.

# How does housing affect health?

- Directly
- Indirectly

- Downstream implications of housing policy & practice

eg: Glasgow & New Towns

- Economics of housing costs – buy, rents, benefits

# How does housing affect health?

- Directly
- Indirectly
- Universally

We are all born  
**'housing – ready'**

# How does housing affect health?

- Directly
- Indirectly
- Universally
- **Unequally**

NHS Health Scotland (2016) Inequality briefings: housing and health inequalities

[http://www.healthscotland.scot/media/1250/housing-and-health\\_nov2016\\_english.pdf](http://www.healthscotland.scot/media/1250/housing-and-health_nov2016_english.pdf)

# A home in which to: 'start, live & age well'

A 'healthy home' is:

- Secure and safe
- Affordable, security of tenure
- Warm & affordable to heat
- Ventilated, free from damp/mould
- Free from hazards, and harm
- Accessible - enabling movement around the home and garden
- Positive local neighbourhood
- Support available if needed
- A 'Smart' home – telecare / telemedicine

# A Healthy Home leads to.....

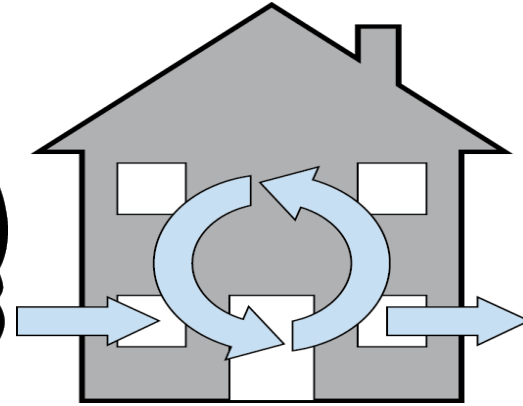

- Improved physical and mental wellbeing
- Early prevention of ill-health
- People self managing their health & care needs
- Allows people to remain in their own home for much longer as their health fails
- Ensures positive care experiences
- Delays and reduces the need for health care and social care interventions
- Timely discharge and reduced hospital re-admissions
- Enables rapid recovery from periods of ill-health or planned admissions

# Applying the Public Health Lens

Health improvement

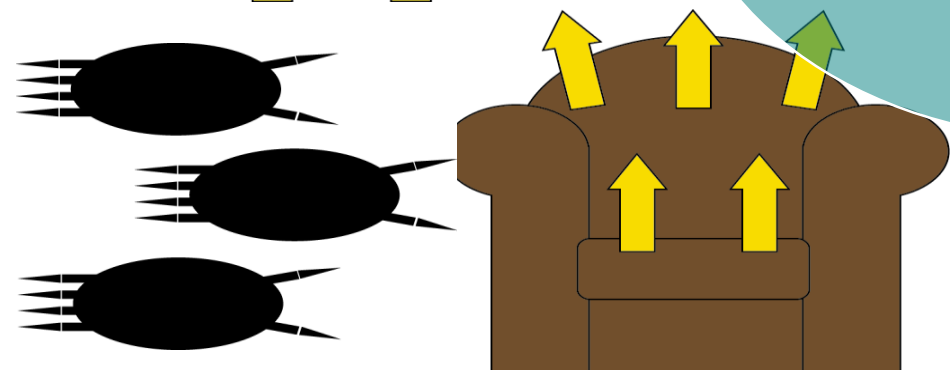

Health & Housing = intelligent healthcare

Health protection

Health and care quality

**Health and Social Care Integration**

**There's no ward like home**

“Homelessness is a core and sensitive indicator of social injustice across Scotland – and therefore must be addressed within the Public Health Priorities in Scotland”

## Housing is rising up the priority list:

- *Scottish Directors of Public Health*
- *ScotPHN Reports, SHIAN and ScotPHN – resources*
- *NHS Health Scotland work programme*
- *NHS Healthcare Improvement Scotland (iHub)*
- *National Health & Homelessness Group/Faculty of Homelessness and Inclusion Health*
- *Scottish Health & Homelessness Conferences*
- *Health input to the Joint Housing Policy and Delivery Group*
- *Health input to the Homelessness Prevention Strategy Group (HPSG)*
- *Health and Homelessness in Scotland Report June 18 (Game-changer evidence)*
- *First Minister statement and Programmes for Government 2017/18 and 2018/19*

## **Where will housing sit in the new PH body?**

- 1. POLITICAL WILL,**
- 2. EVIDENCE,**
- 3. STRATEGIC INTENT,**
- 4. TACTICAL COLLABORATION,**
- 5. FRONT LINE PASSION,**
- 6. EXPERT CO-PRODUCTION, 6. SOCIAL ENGAGEMENT.**

'Houseless and Hungry' by Luke Fildes depicting homeless paupers queuing outside the casual ward of a London workhouse
